DSS * DESIGN SUITE SOFTWARE

DSS
DESIGN SUITE SOFTWARE

Il DSS (Design Suite Software) è un software di ultima generazione, cuore del nostro sistema tecnologico e motore di tutte le applicazioni web based per la gestione dell'intero iter: dalla creazione del progetto al prodotto finito e consegnato. Il suo valore sta nella semplicità di gestione e nei tempi di risposta.

DSS = compatibilità garantita

DSS può essere usato su qualsiasi computer, basta una buona connessione internet e sei subito in linea.

DSS = on-line con la produzione

Con DSS sei costantemente collegato ai server dei nostri partner produttivi e lavori in diretta con loro.

DSS = tutto in tempo reale

Il preventivo che appare alla fine del tuo progetto è in tempo reale - come lo sono i tempi indicati e garantiti - perchè DSS è aggiornato continuamente con i cambi valuta/dollaro e controlla i tempi di produzione e spedizione in base alla disponibilità e alla quantità richiesta.

DSS = non più e-mail

Tutte le informazioni e le richieste sono gestite da DSS in maniera semplice ed ordinata. In questo modo non sono più necessari estenuanti scambi di e-mail: tutto funziona via web. Un unico portale raccoglie, registra e traccia tutte le richieste - incluse le modifiche - e dal pannello di controllo partono degli avvisi che permettono all'utente di verificare e confermare i vari step in linea con gli impianti di produzione.

DSS = la lingua non è un problema

Lavorare nella propria lingua aumenta la produttività e diminuisce il margine d'errore, per questo gestiamo DSS con supporto multilingua. Al momento il servizio è disponibile in italiano, inglese, tedesco, francese, finlandese, rumeno, croato, sloveno, bulgaro. Altre lingue sono in corso di inserimento.

Impatto Zero® è il primo progetto italiano che concretizza gli intenti del Protocollo di Kyoto.

L'obiettivo è di quantificare, attraverso uno studio ed un'analisi approfondita, quante emissioni di anidride carbonica (CO₂) vengono immesse nell'atmosfera in conseguenza di attività produttive o di servizi, eventi, stili di vita di persone; quindi ridurle attraverso uno sviluppo di strategie mirate, infine compensare tali emissioni partecipando alla creazione e tutela di foreste in crescita in aree geografiche selezionate, in Italia e nel mondo (Costa Rica, Madagascar, Panama e Nuova Zelanda).

Ad oggi oltre 350 milioni di prodotti sono già ad **Impatto Zero**® ed hanno aderito più di 800 aziende. Il progetto si avvale di università e partner specializzati nel **Life Cycle Assessment**, e **Bios**, ente certificatore riconosciuto dall'Unione europea, che certifica l'intera filiera del progetto **Impatto Zero**®.

Anche **ATLANTIS** aderisce a questa iniziativa per compensare le emissioni che non si possono ridurre/eliminare con la produzione di questo catalogo. Area di intervento: Costa Rica.

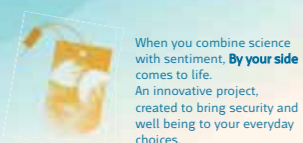

Zero Impact® is the first Italian project that carries out the objectives established by the Kyoto Protocol. The objective is to quantify, through a specific study and analysis, the emissions of carbon dioxide (CO₂) that are released into the atmosphere, due to production activities or services, events, people lifestyles, reduce them through a development of strategies and therefore offset those emissions with the creation and protection of growing forests in certain geographical areas of Italy and of the world (Costa Rica, Madagascar, Panama and New Zealand).

Today over 350 million products are Zero Impact® and more than 800 companies have already joined the project. The project is supported by universities and partners, which are specialized in Life Cycle Assessment, and by Bios which is a certifying organization that certifies the entire process of Zero Impact® project and is recognized by the European Union.

Even **ATLANTIS** adheres to this initiative to offset emissions that can not be reduced/deleted with the production of this catalogue. Intervention area: Costa Rica.

The Hotel Tonnara Trabia is situated at the entrance of Trabia, a village between Palermo and Cefalù, in an area rich in history and natural beauties, near to the Principi Lanza Castle; it was born after a careful restoration of the ancient Tonnara of the XVI century where, in the period between May and June, the ancient ceremony of the so-called "mattanza" took place, a cruel but fascinating tunny fishing which was made under the precise order of the Rais and which was accompanied by songs whose rhythm stressed the fishing.
