READY TO DYE COLLECTION

This collection has been explicitly pre-treated for dyeing, ensuring uniform and optimal color absorption.

Its preparation allows the application of any dyeing technique or shade without limitations, providing a versatile base for unlimited customization and creative freedom. Designed to deliver high-quality results in custom dyeing.

Oversized hoodie made from 350 gsm fabric, crafted in 100% combed and ring-spun organic cotton for a smooth surface, soft hand feel, and structured drape.

A lined hood adds volume and comfort for everyday wear. A self-fabric half-moon at the back neck reinforces this high-friction area and elevates the finish. 1x1 ribbing at cuffs and hem helps maintain shape after washing and frames the silhouette cleanly. A front kangaroo pocket adds functionality and warmth.

Standard production tolerances: $\pm 5\%$ in measurements and weight.
